

Fluorescent Biomolecules and Their Building Blocks -
Design and Applications

We are very pleased to announce the second international conference on:

Fluorescent Biomolecules and their Building Blocks Design and Applications (FB³)

University of California, San Diego, La Jolla, CA, USA
August 6th – August 9th, 2014

Continuing with the model set in the first meeting, the second FB³ meeting will gather scholars from around the world to discuss the development and use of fluorescent probes for biomolecular and nanotechnological systems.

The meeting will bring together established scientists, younger investigators, students and postdocs.

To enable focused discussions, promote exchange of ideas and facilitate networking, the number of participants will be limited to approximately 150.

Keynote speaker: Professor WE Moerner (Stanford)

Additional information, registration and abstract submission:
fb3.ucsd.edu

We hope you will be joining us for this stimulating conference and look forward to seeing you in La Jolla in August 2014!

With our warm welcome,
Yves Mely (Strasbourg)
Marcus Wilhelmsson (Chalmers)
Yitzhak Tor (UCSD)
